

Turismo Vivencial

In Turismo Vivencial we know that **sustainable tourism** is no longer a thing of the future. We work every day to offer a **responsible tourism product**, without losing sight of our priority, the creation of unique **personalised experiences**.

It is in our hands to create a positive impact on the territory visited and therefore we are committed to boosting the local economy, conserving the nature of the destination and preserving its culture and traditions. We believe that the best way to get to know a destination is through the knowledge of its people, the best hosts for our travellers, who will only have to live memorable moments.

Committed to SUSTAINABILITY:

- We guide our steps based on The Sustainable Development Goals (SDGs)
- In 2023 we will renovate for the third consecutive year the **Biosphere** Certificate
- As a travel agency, we are members of the **CETS** certification (European Charter for Sustainable Tourism in Protected Areas)
- We are part of European projects that are working to promote Slow Tourism, such as **TOURBAN** and **MED PEARLS**

We work to make sure that our only trace is an unforgettable memory
